PRONUBEN BABY AC

Anti Colic (AC)

Pronuben baby

Special medical formula for infants aged 0 to 12 months with colic.

Pronuben Baby Anti Colic AC is a formula specifically developed for infants aged 0 to 12 months who experience frequent colic. Colic is one of the most common concerns among parents of newborns, as it can cause discomfort, persistent crying, and distress in babies. Pronuben Baby Anti Colic AC is formulated to help alleviate these symptoms and promote smoother, more comfortable digestion.

The Pronuben Baby Anti Colic AC formula contains partially hydrolyzed whey proteins, which facilitate digestion and help reduce the likelihood of colic. Unlike other formulas, it is free from casein, making it lighter and more suitable for sensitive stomachs. Additionally, its composition, enriched with DHA and nucleotides, supports the development of the baby's brain and immune system, providing an optimal nutritional balance during the early months of life. This combination of ingredients makes Pronuben Baby Anti Colic AC an ideal choice for infants prone to colic, helping to soothe their discomfort and providing peace of mind for parents.

INGREDIENTS

Maltodextrine, **lactose**, vegetable oils (palm oil, palm kernel oil, rapeseed oil, sunflower oil and high oleic sunflower oil), **whey protein concentrate hydrolysate**, minerals (Monocalcium phosphate, trisodium citrate, potassium hydroxide, calcium hydroxide, calcium chloride, potassium chloride, magnesium sulfate, calcium citrate, potassium citrate, ferrous sulfate, zinc sulfate, chrome chloride, sodium molybdate, copper sulfate, potassium iodide, manganese sulfate and sodium selenite), emulsifier (**soy** lecithin and citric ester of monodiglycerides), **fish** oil (source of DHA), vitamins (Ascorbic acid, D,L-alpha tocopherylacetate, vitamin A acetate, nicotinamide, colecalciferol, calcium D-pantothenate, D-biotin, phytomenadione, pyridoxine hydrochloride, thiamine, riboflavin, folic acid and cyanocobalamin), choline chloride, inositol, taurine, L-carnitine, nucleotides (cytidine 5' monophosphate, uridine 5' monophosphate disodium, adenosine 5' monophosphate, inosine 5' monophosphate disodium and guanosine 5' monophosphate disodium). Antioxidants (Ascorbyl palmitate and mix of tocopherol)

COMPLETE FORMULA

Pronuben Baby Anti Colic AC is designed to improve digestion and relieve colic. Its partially hydrolyzed whey proteins facilitate digestion and reduce discomfort, providing gentle nutrition. Likewise, it offers a **balance of essential vitamins and minerals for comprehensive nutritional support, promoting healthy growth and development.**

Enriched with nucleotides, essential components for DNA and RNA synthesis, the formula promotes cellular growth, repair, and a strong immune system, supporting the baby's overall development.

Furthermore, Pronuben Baby Anti Colic AC **complies with the strict standards of the CO-DEX Alimentarius**, ensuring safe, complete, and high-quality nutrition.

Manufactured in Europe under the highest quality control standards, this formula guarantees maximum safety and efficacy to meet the needs of the baby during their growth and developmental stages.

PRONUBEN BABY ANTI COLIC (AC)

Specialized formula.

Pronuben Baby Anti Colic AC is an exclusive medical-use formula developed specifically for infants suffering from frequent colic.

Partially hydrolyzed proteins

The partially hydrolyzed whey proteins are broken down into smaller chains, facilitating digestion and reducing the likelihood of allergies and digestive discomforts such as colic.

Casein free.

Free from casein, a protein that may be difficult for some infants to digest, making it more suitable for sensitive stomachs..

Healthy Fats Enriched with DHA.

An essential fatty acid for brain and visual development. DHA supports the formation of brain and retinal membranes, enhancing cognitive and visual functions during the early months of life.

Complete and Balanced Formula

Pronuben Baby Anti Colic AC is a nutritionally balanced formula providing all the essential nutrients needed for optimal growth and development during the first 12 months of life.
