PRONUBEN BABY CF

# Comfort (CF)

Pronuben baby

**Pronuben Baby CF, formula designed for babies with casein allergy and other gastrointestinal disorders.**

With great specialization, this unique formula, with carob seed and enriched with DHA, has been designed to meet the specific needs of these babies. It provides a complete nutritional solution, ensuring well-being during critical stages of their development.

From birth to 12 months of age, Pronuben Baby Comfort (CF) provides the essential nutrients needed for optimal growth, a strengthened immune system, and healthy cognitive and physical development. Its easily digestible formula, combined with fortified ingredients, gently cares for the baby's digestive system, ensuring smooth and discomfort-free feeding from the first day of life. It is important to note that this product should be used only under medical supervision.

## INGREDIENTES

Maltodextrin, **hydrolyzed whey protein concentrate**, vegetable oils (palm, rapeseed, sunflower, and high oleic sunflower), minerals (monocalcium phosphate, trisodium citrate, potassium hydroxide, calcium hydroxide, calcium chloride, potassium chloride, magnesium sulfate, calcium citrate, potassium citrate, ferrous sulfate, zinc sulfate, chromium chloride, sodium molybdate, copper sulfate, potassium iodide, manganese sulfate, and sodium selenite), **fish** oil (source of DHA), emulsifier (citric acid esters of mono- and diglycerides and **soy** lecithin), carob bean gum, vitamins (C, E, A, niacin, D, pantothenic acid, biotin, K, B6, B1, B2, and folic acid), choline chloride, inositol, taurine, nucleotides (Cytidine 5'-monophosphate, Disodium uridine 5'-monophosphate, Adenosine 5'-monophosphate, Disodium inosine 5'-monophosphate, Disodium guanosine 5'-monophosphate) and L-carnitine. Antioxidants (ascorbyl palmitate and tocopherol-rich extract).

## ADAPTED COMPOSITION

Regurgitation, casein allergy, and other gastrointestinal disorders are common issues faced by babies today, with their prevalence on the rise. Aware of this situation, a comprehensive and specific formula has been developed to effectively address these conditions.

**Protein:** These come from **partially hydrolyzed whey (15%)**. Whey protein has high digestibility and is less likely to cause allergies in babies.

**Carbohydrates:** The low amounts of lactose make it ideal for babies with intolerance to this nutrient, and its high levels of **maltodextrin** ensure easy digestion.

**Fats:** It contains linoleic acid, alpha-linolenic acid, and **DHA** in adequate amounts that are important for the development of the child's brain and nervous system.

**Fibers, minerals y vitamins:** Formulated with **carob seed** as a source of fiber, 14 minerals, and vitamins to ensure complete nutrition in the baby. It also contains choline, taurine, L-cysteine, and 5 nucleotides, which are essential nutrients for the baby's development and growth.

## PRONUBEN BABY COMFORT (CF)

PRODUCT FOR SPECIAL MEDICAL USE

### Specialized formula.

Pronuben Baby CF is an exclusive formula for special medical use specifically developed for babies with regurgitation, low lactose intolerance, casein allergy, and other gastrointestinal issues.

### With carob seed.

Pronuben Baby CF is an innovative pediatric formula, characterized by the **inclusion of carob seed in its composition**. This seed, renowned for its unique nutritional profile, provides a natural source of oligosaccharides, dietary fiber, and beneficial phytochemicals. The presence of these compounds in the formula is associated with prebiotic effects, enhancing the composition of intestinal microbiota and promoting a healthy digestive environment in infants.

### Partially hydrolyzed proteins.

Pronuben Baby CF features partially hydrolyzed proteins, enhancing digestibility and reducing the risk of food allergies in babies with lactose intolerance and sensitivity to casein. These proteins, broken down into smaller fragments, facilitate assimilation and minimize gastrointestinal discomfort, such as regurgitation. This is especially beneficial for babies with immature or sensitive digestive systems, who may struggle to digest intact proteins.
