

Your leading partner
for baby food and nutrition

ABOUT PRONUBEN

PRONUBEN BABY is a Spanish laboratory that develops, exports, and markets baby food products worldwide, with a special focus on the quality and reliability of its products and manufacturing processes.

Our goal is to provide high-quality nutritional products for babies and newborns, ensuring that all parents can make the right choices for their baby's nutritional development.

All our products are created using cutting-edge manufacturing technology, while adhering to the strictest regulations and complying with rigorous quality controls.

Our products bear the most prestigious quality certifications within the European Union.

PRONUBEN BABY currently operates in over 15 countries.

FLEXIBILITY

RESPONSIBILITY

RELIABILITY

FLEXIBILITY. We constantly adapt to give our partners and customers the best possible support. This is now more important than ever, given the constant global change in consumer habits, our goal is to facilitate the distribution and marketing of our products, providing maximum flexibility to our customers.

RESPONSIBILITY. The products we manufacture are entirely intended for babies, the most vulnerable beings on the planet. That is why our R&D department is constantly evolving and developing all our formulas. We are confident that we are providing babies with modern and advanced formulations.

RELIABILITY. Our Global Project Development Team provides professional support for import and export operations, as well as for the implementation of projects in the different markets. We only provide completely finished and adapted products, that meet all legal and quality requirements in the countries of destination.

Advance

PRONUBEN BABY ADVANCE 1, 2, and 3 formulas have been specially designed to provide the right balance of energy through three essential macronutrients: Proteins, Carbohydrates, and Fats.

These formulas are enriched with nucleotides, minerals, and vitamins that play crucial roles in a baby's body, supporting vital biological functions such as hydration, hemoglobin synthesis, proper bone development, and the healthy functioning of the digestive system.

Thanks to minerals like calcium, phosphorus, and manganese, we promote the proper development of the baby's bones.

Vitamin complexes such as B and C, along with essential minerals like sodium and potassium, contribute to the correct development of muscle tissue

Pronuben Baby Advance is formulated with L-Carnitine, which is essential for the formation of ATP, ensuring a sufficient energy source for the baby. Additionally, Taurine is included, a nutrient directly involved in the development of platelets, which are crucial for proper blood clotting in infants.

Formulas that meet the strictest regulations and the most demanding quality controls.

PRONUBEN BABY ADVANCE FORMULATED TAKING INTO ACCOUNT THE NEEDS OF THE LITTLE ONES

ADVANCE 1 has been fully developed for babies from 0 to 6 months of age. At this early stage of life, we need to provide them with the right balance of nutrients.

ADVANCE 2 updates its formulation for this new stage of life between 6 and 12 months, when infants start to taste new foods and flavors such as fruits purees, beef and fish. The mixture of amino acids included in this formula is essential to regulate the correct levels of cholesterol and glucose.

ADVANCE 3 is intended for young children between 1 and 3 years of age, whose nutritional needs increase. The transition to cow's milk is approaching and this will be the last stage before completing it, with ADVANCE 3 they will be fully prepared for it.

PRONUBEN BABY ADVANCE designed to provide the baby with the best nutrition in its first years of life.

Premium

PRONUBEN BABY PREMIUM

PRONUBEN BABY PREMIUM 1, 2 and 3 is an improved formulation completely adapted to the recommendations of specialized organizations in infant health and nutrition.

With a perfect ratio of Omega-6 and Omega-3 acids, which are involved in the development of brain and visual functions as well as the regulation of the immune response.

PREMIUM 1 has been fully developed for babies between 0 and 6 months when breastfeeding is not possible or not sufficient.

PREMIUM 2 is the follow-on powdered milk for babies between 6 months and 1 year. It includes FOS and GOS, prebiotics that collaborate in the regulation of intestinal transit and intestinal flora.

PREMIUM 3 is a growing-up formula for young children from 1 to 3 years old. Formulas that collaborate in the transition to cow's milk. It has been enriched with 13 vitamins and 14 minerals, adjusting the quantities for the growth phase for which it is indicated.

FORMULAS DEVELOPED WITH THE MOST INNOVATIVE NUTRIENTS

-The PREMIUM range of products provide the energy that every child needs during the first three years of life, a very challenging and exhausting stage of life in terms of growth and nutritional requirements.

- PRONUBEN BABY PREMIUM is made with raw materials of the highest quality and with the perfect balance of nutrients.

- These formulas have been designed to be as similar as possible to breast milk in terms of composition and taste. At PRONUBEN we give the utmost importance to breastfeeding and, following the recommendations of the WHO, we know that breast milk is the best food for newborns and should be prolonged as long as possible. In the event that breastfeeding is not possible or insufficient, PRONUBEN BABY PREMIUM provides the necessary nutrients for the baby.

Our most complete and enriched formulas; with ARA, DHA, FOS and GOS.

Special formulas

The PRONUBEN BABY portfolio offers over 10 specialized formulas developed with the highest standards. These medical formulas prioritize addressing infants' eating issues and intolerances while ensuring complete nutrition. Key formulas include:

LF (Lactose-Free): Featuring maltodextrin as the sole carbohydrate source, ensuring easy digestion and low osmolality. Enriched with nucleotides to aid digestive system maturation.

AC (Anti Colic): Crafted with partially hydrolyzed proteins for improved digestibility and milk tolerance. Components provide a balanced diet for infants.

AR (Anti Reflux): Incorporating locust bean gum, an emulsifier that enhances thickness for better milk assimilation and reduced regurgitation in reflux-prone babies.

CF (Comfort): A blend of partially hydrolyzed proteins, locust bean gum, and specialized carbohydrates for babies with recurring gut discomfort. It minimizes gas, aids smooth digestion, and promotes better sleep.

Our specialized formula targets infants with regular gut discomfort, alleviating their issues by reducing discomfort, preventing excessive gas, promoting intestinal movement, and facilitating better sleep. PRONUBEN BABY ensures comprehensive solutions for optimal infant nutrition, even in the face of specific dietary challenges.

Specials

All our special formulas are enriched with Vitamin E, which plays a vital role as an antioxidant and ensures the correct development of the immune system, improving the baby's defenses.

- Whenever possible, FOS and GOS are included, which provide a prebiotic effect and contribute to the maturation of the digestive and immune systems.

- With AA and DHA (Arachidonic and Docosahexaenoic Acids) that are totally necessary for the development of the brain, sight and central nervous system.

-All our special formulas are suitable from 0 to 12 months. Always use these formulations under prescription and medical supervision.

Discover our entire range of special formulas. Formulas in constant development, taking into account the evolution of the most necessary nutrients and how their need varies over time, as well as maximum safety during their manufacture.

Baby food

At Pronuben Baby we are convinced that the **BEST NUTRITION** comes from the **BEST INGREDIENTS**.

All PRONUBEN BABY purees are made with selected top quality ingredients. Fresh fruits and vegetables harvested in the sunny fields of eastern Spain.

Smooth and creamy recipes that combine complementary ingredients for a completely balanced and varied nutrition.

PRONUBEN BABY fruit purees are designed for babies from 4 months.

From 6 months it is recommended add new foods and flavor such as chicken and beef, our recipes are cooked only with the finest vegetables and extra virgin olive oil.

Finally, our hake recipe intended for babies from 8 months onwards.

All babies love our products for their naturalness and fantastic taste.
